OSU College Forests

In this Issue:

- Welcome
- CSC
- Did You Know?

Forest Information:

Please help keep our trails sanitary by removing pet waste.

Peavy Lodge:

Is no longer available for rent

Welcome...

As summer starts to wind down, I hope that you take the opportunity to get out into the forest and enjoy the beautiful colors of all the trees.

We have had a successful summer and completed many projects. Inside you will see some photos from some of the work completed. I hope you enjoy them.

Two community groups played a major role in helping to complete the work this summer. Community Services Consortium provided a work crew for five weeks, and for the third year in a row, the City of Corvallis Youth Volunteer Corps spent time working on trails. This program is a perfect way to encourage youth to explore the outdoors, through working on a service project. A big thanks to all.

Feel free to contact me and, as always, enjoy the forest!

Chris Jackson

Community Services Consortium.....Thanks!

Funded by Federal Stimulus dollars, Community Services Consortium was able to provide a crew to assist in our summer trail maintenance projects. The crew worked for five weeks and accomplished a great amount of work (see below). Without this partnership much of the work would not have been completed.

Trailside Brushing

Cleaning Bridges

Gravelling Trails

The Crew!

Finished Trail Work

Ways to help.....

As always, volunteer help is appreciated, and no matter how little time you can provide, we are almost always able to accommodate you.

For those of you who are unable to physically help out you can always help by making a tax deductible, financial donation to the OSU Foundation for the "Research Forest Recreation Fund".

Did You Know. . . Forestry Club Cabin?

One of the more cherished buildings in the Arboretum is the Forestry Club Cabin. Constructed with student labor, the first Forestry Club meeting was held there December 2, 1925. In February 1949, that cabin burned to the ground after a fraternity dance. Another student crew, led by Marvin Rowley, quickly rebuilt the cabin on the same site. This is the building that stands today.
