BUGGY BINGO

Can you find these bugs and get a bingo? Get creative! Look under rocks, in moss and don’t forget to take a close look at the tree bark!
Once you get three in a row, yell "BINGO!"

Pill Bug aka Rolly Poly
Snail
Ladybug
Ant
FREE
Grasshopper
Caterpillar
Centipedes
Bee
Put on your searching hat and get to work looking for animal tracks. These tracks tell us where animals have been. Can you find tracks for all these animals? Where do you think they were going?

**SAFETY FIRST**
Exploring outside and tracking animal prints is so fun! But sometimes tracks can lead to dangerous animals. To be the best tracker you can be it is important to always put safety first. Always check in with a trusted grownup and make sure the area you want to go tracking in, is a safe place to be.
ROCK & ROLL

Turn something boring into something beautiful. Painting rocks is a popular hobby in the northwest. In fact, there are groups that paint rocks and hide them for others to find. You can join these groups, or just decorate your yard with some beautifully made rocks!

1. **Collect Your Supplies**
   First find your rocks! Check with a grown up to make sure those rocks are ok to use. Collect paint, brushes, markers and any other decorations you want to use.

2. **Find Your Workspace**
   Keep it clean! Find a work space to create your rocks. Make sure you cover your workspace with newspaper, paper towels or something that will make for easy clean up.

3. **Get Creative!**
   Start painting! For best results paint your rocks white and let them dry. Once dry you can draw on your design or start in right away with your colors. Give your rocks good time to dry so your designs stay in place.

4. **Display Your Beautiful Art**
   Find a spot in your yard or garden. If you want to add your rock to the hunt for others to find, ask a grown up to go to the group "West Coast Painted Rocks #WCPR" on Facebook.
GREEN GRUB

If you are ever lost in the woods, you might get hungry but not have any food. Some plants are safe to eat, but others are dangerous and can make you sick. Can you find these plants and learn what is safe to eat?

- **Dandelions**
  - Is **OK** to eat (edible)

- **Cattail**
  - Is **OK** to eat (edible)

- **Foxglove**
  - Is **NOT OK** to eat (non-edible)

- **Blackberries**
  - Is **OK** to eat (edible)

- **Poison Oak**
  - Is **NOT OK** to eat (non-edible)

- **Wild Mustard**
  - Is **OK** to eat (edible)

- **Oleander**
  - Is **NOT OK** to eat (non-edible)

- **Rosemary**
  - Is **OK** to eat (edible)

**SAFETY FIRST**

Hopefully, you are never in a situation where you have to survive on plants in the wild. But if you ever find yourself in that situation, it is so important to know what you are putting into your body. NEVER eat any plant that you are not 100% positive is edible. Stay safe!
TO FALL OR NOT TO FALL

Every year some trees lose their leaves, but some trees stay green all year long. Why is that? Well some trees are called "evergreens", this means that they stay green all year round! Can you tell the difference? Find the trees and decide if you think they are an evergreen or not. Check the boxes of only the evergreens. What are some differences you found?

1. Douglas Fir
2. Maple
3. Spruce
4. Redcedar
5. Thuja
6. Alder
7. Willow Tree
8. Ponderosa Pine

What's something you noticed about evergreens?

Answer: Evergreens are 1, 3, 4, 5, 8
