Welcome to the McDonald Dunn, and Cameron Research Forests!
The Oregon State University Research Forests consist of the McDonald Dunn, and Cameron Research Forests. These forests are located near the Corvallis and Lebanon areas of Oregon, and are part of the greater Oregon State University Landscape. The forests are used for a variety of educational and research purposes, including oak woodlands, forest plantations, and natural ecosystems and forest management.

Accessing the Forest

- By car: Take U.S. Highway 20 to Corvallis, and then follow the signs to the Forest Road. The closest airport is the Paine Field, which is located in Portland. The Forest is open to visitors year-round, but seasonal restrictions will be implemented based on weather conditions.

Guidelines & Information

- Limited vehicle access to the Forest roads is by permit only.
- The Forest is closed during Open Season.
- For your safety, follow all permit restrictions and road closures. This is a working forest with active timber harvests, and you may see equipment and personnel in the area.
- A permit is required for any vehicle use within the Forest.
- Trailhead parking is limited, and parking is not allowed on Forest roads.
- Good wet weather alternatives: Dan's, Upper and Lower Bald Hill.
- Be careful when crossing roads, and always yield to traffic.

For your safety, please:

- Drive and park slowly and carefully.
- Be alert for hiking and trail use.
- Keep trails and roads clear of litter and debris.
- Keep dogs on a leash and under control at all times.
- Use the closest vehicle access point to the Forest.
- Follow all posted trail and road closures.
- Do not litter or leave research sites.
- Let us know if you have any questions or suggestions.

Volunteer

Here’s how you can help:

- Donate to support trails
- Volunteer
- Visit lower-use trailheads
